

WHO WE ARE

The National Association of Division Order Analysts (NADOA) was created in 1974 as a voluntary organization dedicated to promoting the highest degree of: **Professionalism, Technical Expertise, & Ethical Standards.**

Through its annual institute and regional seminars, NADOA strives to **Provide Education, Facilitate Knowledge and Ensure Excellence** for members while promoting communication between Division Order Analysts and their partners/customers in the energy industry, the government and the private sector.

As a leader in attempting to propose solutions to problems confronting the Division Order industry, NADOA works closely with other industry groups to identify mutual concerns, analyze problems and recommend mutually beneficial solutions.

National Association of Division Order Analysts

GROWTH THROUGH
EDUCATION

CERTIFICATION

In 1987, the National Association of Division Order Analysts achieved a major goal of the organization through the inception of its Voluntary Certification Program policy. The objective of the policy is to enhance and strengthen the professional status of the Division Order Analyst. For individuals who attain the designation of Certified Division Order Analyst (CDOA) the policy provides a standard by which the industry, public, and other official groups can recognize that those individuals have attained a high level of Division Order experience, knowledge and professional competency.

Certification is available to all eligible Division Order Analysts, whether or not they are a member of NADOA. To be eligible for certification, one must have a minimum of five (5) years Division Order experience (2 years may be substituted by a college degree) and be currently employed in that work or a related position. After application for certification has been approved, the individual's technical competence will be tested by a written examination based on material contained in the CDOA Review Manual. For more information on becoming a CDOA, please contact:
